Subject Index

Acetone exhalation 123
Acetoxymethyl-methylnitrosamine 45
Acrolein 243
Acrylamide 35
Adrenalectomy 233
Aflatoxin B_1 249
δ-ALAD, $Zinc^{2+}$ in 1
Alcohol dehydrogenase 199
Alkylating agents 45, 221, 249
δ-Aminolevulinic acid synthetase (ALAS) 13
Aristolochic acid 209
Aromatic hydrocarbons, polycyclic 249

Benzaldehydes 199
Benzyl alcohols 199
Brain, different regions of 35

Cadmium 91, 99, 291
Caecal microflora 311
Carbon tetrachloride 123
Carcinogenicity 45, 165, 209, 249
Cellulose, dietary 311
2-Chlorobenzylidene malononitrile 183
Cholinesterase activity, plasma 233
Chromatin condensation by Cd 91, 99
Colchicine 221
Complement (C3d) 149
Covalent binding 249
CS 183
Cytokinetic effects 221
Cytostatic drugs 45, 221, 249

Demyelination, paranodal 83
Dichloromethane 287
Diethyl maleate 233
Distribution and excretion of Cd 291
DNA adducts 249
DNA repair test 287

Electron microscopy 99, 165
Embryotoxicity 23, 45
β-Endorphin 35
Endrin 221
Epoxides 249
Ethane 123, 135
Exhalation 123, 243

Fenitrooxon 233
Fenitrothion 233

Glutathione depletion 109
Glutathione levels, hepatic 109, 233

Hair, methamphetamine in 157
Hemoperfusion 149
Hepatocytes 91, 99, 109, 287
Hexachlorobenzene 13
Hexachlorophene 221
Histology 23, 83, 91, 183, 209
Hydrocarbons, aliphatic 123, 135

Inhalation exposure 183
Inhalation pharmacokinetics 123
Immunoglobulins 149

Laboratory animals (normal mice and rats not mentioned)
  Cats 83
  Guinea pigs 183
  Hens 71
  Rabbits 23
  Rats, neonatal 291, 311
Lead 1
Lipid peroxidation 123, 135
Liver cell culture 91, 99
Lymphoid cells in vitro, human 221
Lynestrenol, transplacental distribution of 23

Malformations, paw 45
Mercapturic acids 199
Mercury, methyl 173
Metallothionein, hepatic 291
Methacrylate, methyl (monomeric and polymeric) 109
Methamphetamine 157
Methaphenilene 165
Methapyrilene 165
Methyl methane-sulfonate 249, 287
Microbial metabolism 311
Microsomal monooxygenase activities 109
Mustard, nitrogen and sulphur 249
Mutagenicity 249, 287

Nephelometer, laser 149
Nerve excitability 167, 173
Neuropeptides 35
Neurotoxic esterase 71
Neurotoxicity 71, 83, 167, 173
Neurotransmitter metabolism 35
N-nitroso compounds 45, 249
Nucleic acid alkylation 249

Organochlorine pesticides 221
Organophosphates 71, 167, 233

Parathion 167
Pentachlorophenol 199
Pentane 123, 135

Phosphoramidofluoridates 71
Poisoning, human
Barbiturate and Paraquat 149
Porphyria in rats 13
Porphyrins 1, 13
Progestins 23
Prolactin, plasma levels of 35

Reticulocyte count 1

Sarin 71
Selenium protection (methyl mercury) 173
Sister chromatid exchanges (SCE) 221
SKF 525-A 233
Soman 71
Streptozotocin 249

Tabun 71
Teratogenicity 23, 45
Testosteron 35
Tetanus toxin 303
Trichlorphon 167

Urinary thioethers 109

Vincristine 83
Vinyl chloride 123, 249
VX 71

Wallerian degeneration 83
